Alexei Night is a vampire and an agent of the Special Task Force. When Interstellar Council Representative Briana Michaels' support of the rights of vampires put her and her family in danger, Alex leaps at the chance to protect her. Under the guise of a smuggler, he attains the much-coveted assignment to transport her to her destination. Now he has two weeks alone in her company, and he has every intention to spend it in bed...with her. Little does he know that his competition would come in the form of a sexdroid.

Briana is desperate to get to her homeworld and needs the exclusive skills of this seeming criminal, Alex Night. Despite the promise that whirls in his eyes, she is determined to keep it professional. But her fight to remain unmoved fails under his charm, and her desire to possess him leads to hot nights of wondrous sex. Enamored by his soft words and hard body in her world of turmoil, he is the only solid thing in her life she can cling to. The two weeks they spend together ends too soon and she is pulled back into the political arena that will expose her to those who want her dead.

In her determination to remain true to herself will she lose her one chance at happiness, or come to accept her dark lover for only her lifetime?

Ms. Day supplies a luscious tale of an Alpha male and an equally strong female to match him in this interstellar romance. With hot sex scenes, where for once the vampire has enough restraint not to suck her blood while giving her pleasure, it was a refreshing change. This romance has your dark-Knight in shining armor and a damsel who, although in distress, handles the situation with finesse. With a strong heroine, a romantic hero, and great storytelling, this is a trip of a life time!
